Planning for an Emergency Drinking Water Supply

The [Planning for an Emergency Drinking Water Supply](#) Report was developed through a partnership between the Environmental Protection Agency's (EPA) National Homeland Security Research Center and the American Water Works Association (AWWA). The report offers a resource to review the roles and responsibilities among various levels of government and essential planning steps. It serves as a complement to the [Emergency Water Supply Planning Guide for Hospitals and Health Care Facilities](#). Emergency preparedness is something we should all consider whether a corporation, government agency, utility, or even in our own homes. For more information, visit www.ready.gov.

ACE 2011!

HSG's Carrie Lee and Christine Herndon attended AWWA's Annual Conference and Exposition (ACE) this past June in Washington DC! As always, the conference allowed for us to see many of our colleagues and discuss pertinent issues to the water and wastewater industry! We are looking forward to ACE 2012 in Dallas TX next June!

Federal Capabilities
