Advancing Your Missions with Speed, Rigor, and Resiliency

HSG specializes in comprehensive, fast, and expert environmental planning, permitting, and regulatory compliance; occupational health and medicine; emergency planning and response; and risk management services.

We are a woman-owned business with a 50-state reach that excels in on-the-ground work for clients, including environmental due diligence, sampling, and risk mitigation for complex infrastructure projects; energy and water efficiency solutions deployable day one; dust mitigation and water collection, and managing community outreach and compliance to federal, state, and local regulations from project inception all the way to post-construction.

We are NASA's leading environmental services firm nationwide and our additional clients include Space Force, Bureau of Land Management, National Park Service, Forest Service, commercial construction companies, commercial aerospace clients, and local water authorities in Nevada, Colorado, and California.

Our experienced team, comprised of compliance specialists and certified auditors, geologists, ecologists, biologists, archaeologists, emergency planners, certified HazMat and safety specialists, and medical staff, will be your go-to partner when you are ready to plan, develop, build, dig, or launch. Our goal is to help you move faster with less risk, lower cost, and smarter energy use.

HSG is an award-winning, women-owned business that works with leading government and commercial customers to identify operational risks, navigate complex environmental compliance challenges and regulatory requirements, develop emergency planning and response, and provide occupational health and hygiene solutions.

Core Capabilities

Environmental Services

Environmental Compliance

Environmental Due Diligence

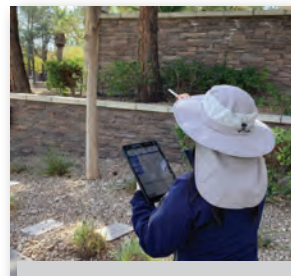

Environmental Resource Management

HSG combines technical expertise, regulatory foresight, and environmental innovation to help organizations meet their project objectives on task, on time, and on budget in today's changing regulatory environment. Our deep bench of SMEs are experienced in high-demand, high-complexity environments including critical infrastructure sectors. We translate complex technical findings into memo-ready language to support and advance investment decisions and business objectives.

Litigation Support

Our deep bench of trained environmental professionals provide case file and administrative record support; information and records collection, compilation, and management; and thorough and extensive Potentially Responsible Party (PRP) searches and reports.

Water Conservation

HSG provides full lifecycle program design, implementation, and management—including strategic planning, staffing, and streamlining operations—for efficient, compliant, and results-driven program execution of water conservation programs, including dust suppression and arid community water savings programs.

Emergency Planning & Response

HSG is committed to providing professional services to assist clients with identifying risks, mitigating those risks through planning and training, developing effective emergency response and recovery plans, and demonstrating compliance.

Health & Safety

HSG is dedicated to a healthy worksite as an integral part of mission success and delivers collaborative solutions in workplace safety, industrial hygiene, health physics, sanitation and public health, wellness and health promotion, and medical services.
